PROFILE

Computer Science student passionate about Artificial Intelligence, full-stack development, and software engineering. Experienced in building user-friendly web applications using React, MongoDB and modern technologies. Actively engaged in hackathons with strong problem-solving, adaptability, and teamwork skills. Eager to contribute to real-world projects and grow professionally in software development.

EDUCATION

- Bachelor of Engineering – Computer Science | CGPA-9.13 Expected 2027
Sahyadri College of Engineering & Management, Adyar, Mangalore
- Pre-University College (PCMC) | 95% | 2021-2023
Alva's PU College, Vidyagiri, Moodbidri

TECHNICAL SKILLS

- Programming Languages:** Python, C, SQL
- Web Technologies:** HTML, CSS, JavaScript, React
- Database & Analytics:** MongoDB, KNIME, Excel
- Tools & Platforms:** Git, GitHub, VS Code, Google Colab

PROJECTS

- [PulseIQ](#) **Non-Invasive Blood Glucose Monitoring Device** - Developed the software module of a machine learning-based non-invasive blood glucose monitoring system for glucose level prediction. Implemented **data preprocessing**, **prediction algorithms**, and sensor data analysis techniques to provide an efficient alternative to traditional glucose monitoring, with hardware integration currently in progress.
- [CityScope](#) - Developed an AI-powered smart city application using **Next.js**, **React**, and **MongoDB** for reporting and managing civic issues. Implemented **YOLOv8-based image classification**, **location tracking**, and **map integration** to automatically identify and route issues such as potholes and garbage dumps to the appropriate departments.
- [LogiTrack](#) - Built a full-stack web application for parcel management and real-time delivery tracking using **Node.js**, **Express**, **MongoDB**, and **JavaScript**. Implemented parcel and **driver management**, status updates, **live location tracking**, and **interactive map features** to improve delivery operations and monitoring.
- Restaurant One Solution – Data Analytics Project** - Built a comprehensive restaurant performance analytics system using KNIME workflows for data cleaning, transformation, and business intelligence. Analyzed order patterns, payment trends, delivery performance, and revenue metrics to generate actionable insights through interactive dashboards and visualizations.
